Prior to configuring your machine for DuqNet wireless you need to initialize your MultiPass account (credentials that you will be using for wireless). To do so, visit http://www.duq.edu/multipass and click the link for Initialize Your MultiPass. Once you've followed the on-screen prompts and have initialized your account you can proceed with the following instructions. Keep in mind that you will use this password that you've just created to setup your wireless connection.

Review Duquesne's Wireless Airspace Policy

http://www.duq.edu/about/campus/computers-and-technology/policies/duqnet-wireless-policy

Users can follow the steps below to set up wireless on an Android mobile phone or tablet. Please note that Android versions 4.1.1. and 4.2.2. do not connect to DuqNet. If you have either of these Android versions, please update your device to the most recent Android version available.

1. Click on the Apps Menu on the Home Screen.
2. In the Apps Menu, choose Settings.

3. In Settings, choose Wi-Fi.
4. In Wi-Fi, choose DuqNet.
5. For DuqNet, EAP method will be **PEAP** and Phase 2 authentication will be **MSCHAPV2**. Leave CA Certificate as *(unspecified)*.
6. Enter your **Multipass username** for Identity and your **Multipass password** for Password. Leave Anonymous Identity blank. After entering your Multipass credentials, click Connect.
7. You are now connected to DuqNet. If your device does not connect, please power it off and then back on. After doing so, repeat the above steps. If it still does not connect, feel free to stop by the CTS Help Desk on the 2nd floor of the Union, or call at 412-396-4357.
