Getting started in PubMed@Duquesne...

Within the PubMed@Duquesne database, search for an author or title. Click Search.

Navigating Search Results

Click the title to display article details.

If the article has been cited by a PubMed Central article(s), it will be displayed on the side of the screen with links to the citing articles.

Click the citing article title to view details and related citation information within PubMed Central.
Note: Not all articles available in PubMed@Duquesne are available in PubMed Central. Within the PubMed Central database, search for an author or title. Click Search.

Navigating Search Results

Click the title to display article details.

If the article has been cited by a PubMed Central article(s), it will be displayed on the side of the screen. Click See all...

The generated list includes a link to the originally cited article, followed by the number of citing articles within PubMed Central’s Archive. Click on the article titles to view details.
Additional Citation Possibilities

**Note:** If PubMed@Duquesne returns an article result published in a journal to which Gumberg has an online subscription, you may be able to find additional citing articles through that electronic journal.

Within an article record, publication location is displayed to the right of the screen. Click on the image icon that is not PubMed or FindIt to visit that database.

In this case, Gumberg subscribes to the journal *Brain Research* via ScienceDirect. By clicking the image icon for this database, you can utilize whatever citation tools are available.
